ABOUT ME

I am an Enthusiastic Designer, who has completed a course in Interactive Media Design from Seneca College, North York. I have had the opportunity to assist and learn from various content producers as an intern and since Design thinking is all I have ever do, I have the benefit of looking at different situations from Designers perspective. Being a quick learner, I grasp new skills swiftly. Additionally, I excel at maintaining a positive work environment wherever I go and whoever I work with. I am looking to utilize and expand my skills, knowledge, and experience in the world of designing.
